Highest quality healthcare

We believe exceptional care begins with genuine connection. Our friendly, long-standing team take the time to really get to know each resident – their routines, stories, and what makes them smile.

With familiar faces and trusted relationships, life at Glencairn feels safe, comfortable, and full of care. Because our home is small and personal, residents and staff share a true sense of community. We invite residents to be part of our recruitment process, to ensure every new team member shares our warmth, compassion, and commitment to care.

We understand that needs can change over time. As a residential home with strong links to the district nursing team, we can provide extra clinical support

if and when it's needed most – offering comfort, reassurance, and peace of mind for residents and their families.

Each resident has a personalised care plan, shaped around their preferences, lifestyle, and wellbeing goals – whether for long-term supported living or short-term respite care. We work closely with trusted professionals, including GPs, physiotherapists, dentists, and other specialists, to ensure care is coordinated, consistent, and always delivered to the highest standard.
